Instructional Design Basics
Duration: 1 Day

**aurion** LEARNING

Course Overview

Are you thinking of creating online learning courses? This introduction to instructional design will help you get started. We will introduce you to relevant learning theories and instructional design approaches and assist you with curriculum design.

We will explore the role of learning platforms and authoring tools, and throughout the day you will apply what you learn to your own outline course design.

Learning Outcomes

After completing this course you will be able to:

- Select an appropriate digital course design.
- Design a basic self-paced and/or blended course.
- Use the Absorb, Do and Connect design framework.
- Use the Action Mapping approach.
- Select an appropriate learning platform and authoring tool.

You will need

An outline course design.

Instructional Design Basics

Session	Content
What is Online Learning?	Introduction to online learning and the various tools and technologies.
The Pedagogy of Online Learning	A look at how adults learn and what makes for a compelling and engaging learning experience.
Learning Pathways	Introduction to these learning pathways: - Self-paced. - Social. - Supported. - Blended.
The Learning Mix	A look at blended approaches. Use of the flipped classroom.
Learning Outcomes and Success Measurement	Determining learning outcomes for your course and deciding on the evaluation approach.
The Absorb, Do and Connect (ADC) Framework	Applying the ADC instructional design framework, for developing successful learning interventions, to your course design.
Action Mapping	Applying Action Mapping, for designing performance based learning interventions, to your course design.
Learning Platforms	A look at the role of the Learning Management System/Virtual Learning Environment in learning design. Overview of a learning pathway design.
Authoring Tools	Introduction to some key e-learning authoring tools. The role of authoring tools and the SCORM standard.
