

Instructional Scenarios

Duration: 1 Day

Course Overview

Find out how to engage learners by using real-life scenarios. On this practical course you will learn how to structure and storyboard engaging, instructional scenarios with characters, settings and decision points. You will design your own scenario during the day supported by our trainer.

Learning Outcomes

At the end of this course you will be able to:

- Identify the thinking behind using instructional scenarios and the benefits they offer as a learning tool.
- Recognise the challenges of writing scenarios: the need to make them 'real'.
- Storyboard a branching scenario that includes appropriate decision points and consequences.
- Write a complete scenario using different contexts.
- Evaluate the impact of a scenario and incorporate feedback into subsequent designs.

You will need

- A computer so you can develop scenarios.
- Your own learning content for an example scenario.

Instructional Scenarios

Session	Content
Why Use Instructional Scenarios?	The benefits and challenges of using scenarios. The underpinning learning theory.
How to Storyboard a Scenario	Key steps: <ul style="list-style-type: none">- Introducing characters.- Setting the context.- Creating a dilemma or decision point.- The impact of each decision option.- Consequences.- Branching and recapping.- Completing the scenario.- Graphic design and build.
Getting Started	Practice session 1 (small groups). Each group plans and storyboards an example scenario. Review of outcomes.
Skill Building	Practice session 2 (small groups). Each group plans and storyboards a second example scenario.

Your Turn!

Participants work on their own real-life example, coached by the trainer. They then present their scenario back to the group for peer review.

Evaluation

Discussion of different approaches and lessons learned.
